Re: Huntington BRO 1445(35) TH 22, Bridge 30 over Brush Brook

We have completed our Scoping Report for the subject bridge project that documents the various alternatives we have considered. This Report also includes our recommended course of action. We would like to make a presentation based on this Report to the community as soon as possible.

This presentation should be a warned meeting as required by your local rules and adequate notification should be provided to adjacent property owners as well as other stakeholders and interested parties. If our recommended alternative requires detouring traffic into an adjacent town, other communities should also be notified.

Please contact me at your earliest convenience to arrange a time and date for this meeting. I would prefer an evening meeting on Monday, Tuesday or Wednesday if possible

I am attaching two copies of the Scoping Report in advance of the meeting for your information. These copies should be made available to other interested parties who would like to review this information prior to the meeting.

I have copied a representative from your Regional Planning Commission and would encourage you to work with them to schedule a time and develop a distribution list for this meeting.

If you have any questions, please feel free to contact me via email at Chris.Williams@State.VT.US or by phone at 828-0051.

Sincerely,

Christopher P. Williams, P.E.
Structures Project Manager
